

SCENE-1

At midnight, a group of soldiers move through a forested area towards a rocky cave on the side of a mountain. The fire burning in the cave is reflected outside. When they reach the entrance of the cave, the group divides and makes a sudden raid into the cave from 2 columns, but it is realized that the cave is empty. The soldiers are demoralized. One soldier is examining the remains of the cave's occupants and notices an old map that has been dropped on the ground. The group gathers around the fire and begins to examine the map. It is seen that there are keys in different areas on the map and that there is a great treasure.

SCENE-2

The whole map is visible from a drone camera. The drone rotates around its axis, scans the surroundings and follows the 2 speeding vehicles, locking on to them.

SCENE 3

Two vehicles are seen traveling fast on the ground. A buggy in the front and a jeep in the back. The driver of the jeep has a very excited and ambitious expression. He has the keys to the treasure hanging around his neck. He is shooting at the vehicle in front with a pistol in his hand. The buggy driver, on the other hand, is maneuvering nervously to get rid of the vehicle behind him, opening and closing the protection shield.

SCENE 4

A sniper rests his elbows on an ammunition crate, camouflaged from a high hill, quickly observes the wooded area with his binoculars and calmly fires at a target in the woods that is running away from him.

SCENE 5

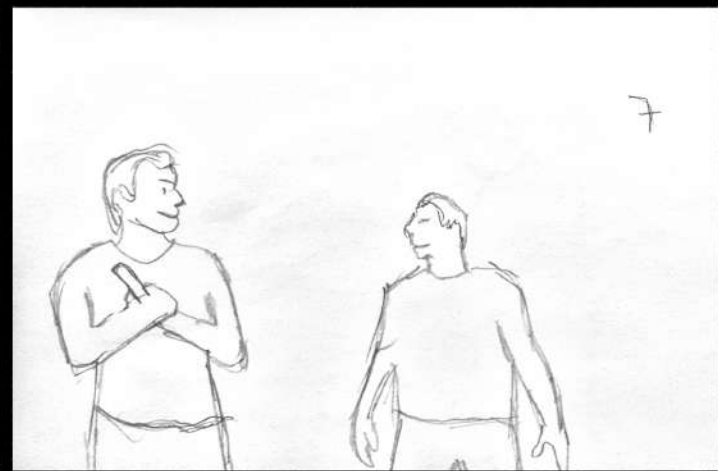

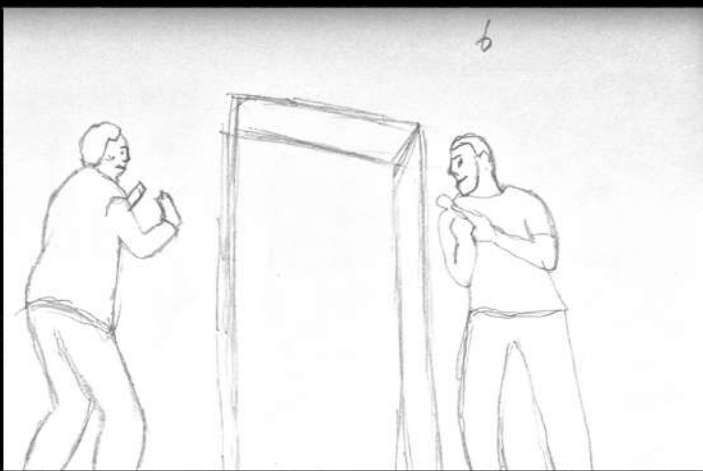

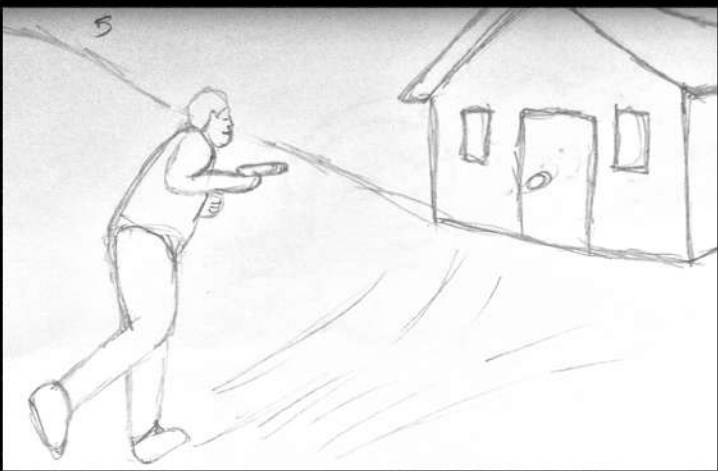

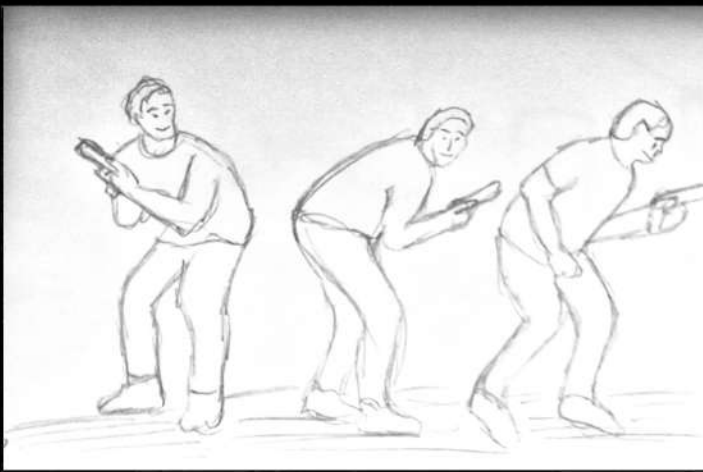

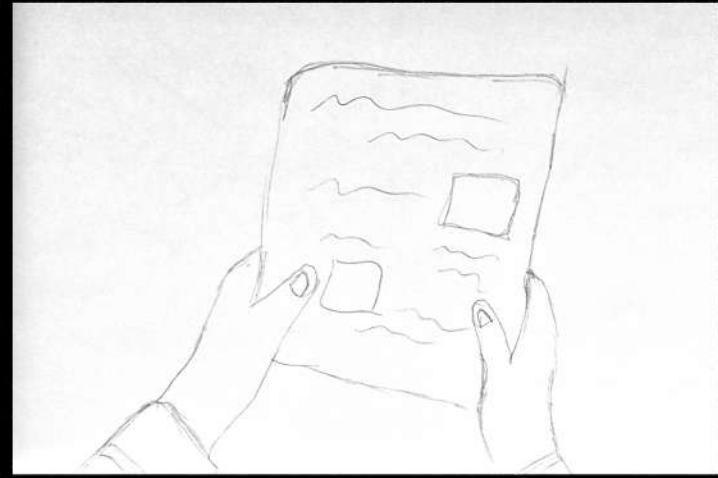

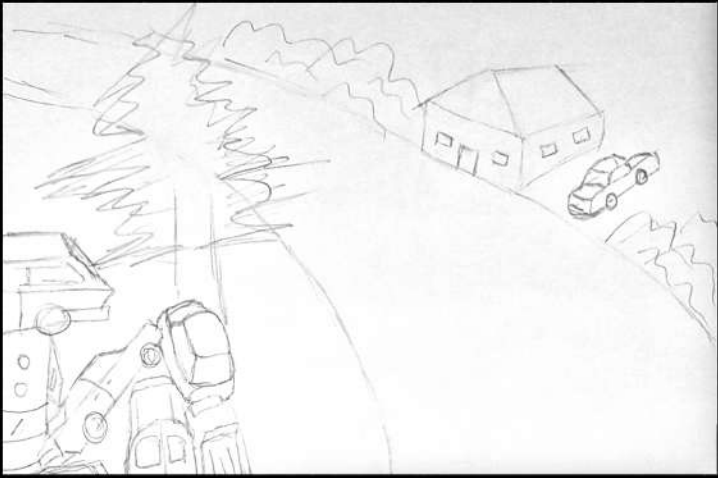

In the forest, a soldier tries to escape by running with all his might. During his escape, he is constantly exposed to sniper fire (while running, he is seen running over or past some traps without getting caught) He takes shelter in the trees and rests and continues to run. As he rests, he clenches the key in his palm, brings his hand to his chest and looks helplessly at the sky. He is startled again by a sudden shot, a bullet hits the tree he is leaning against. He continues to run in panic.

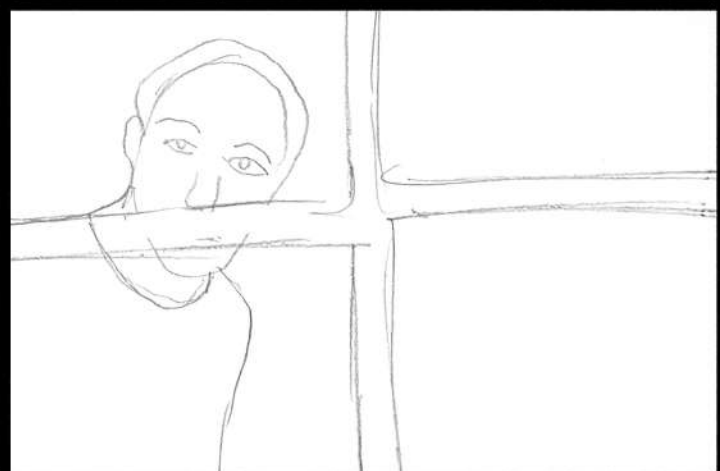

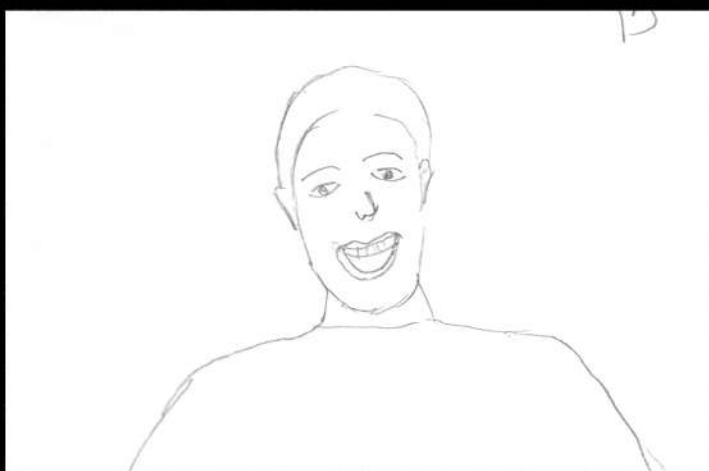

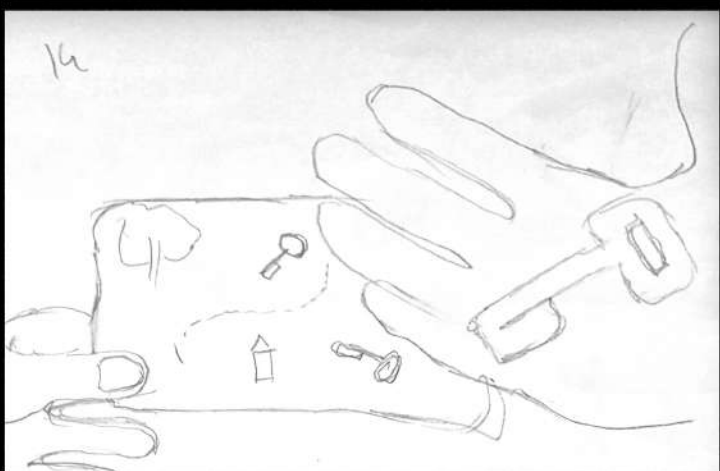

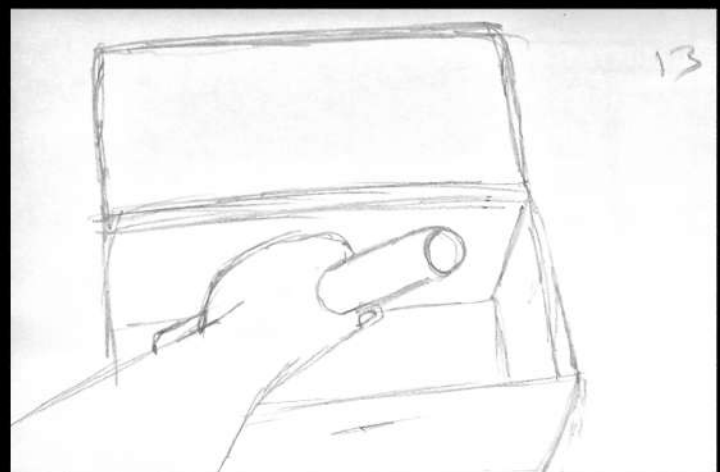

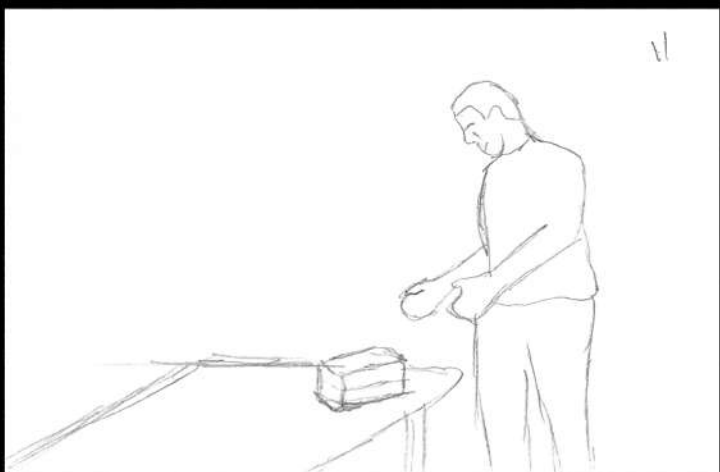

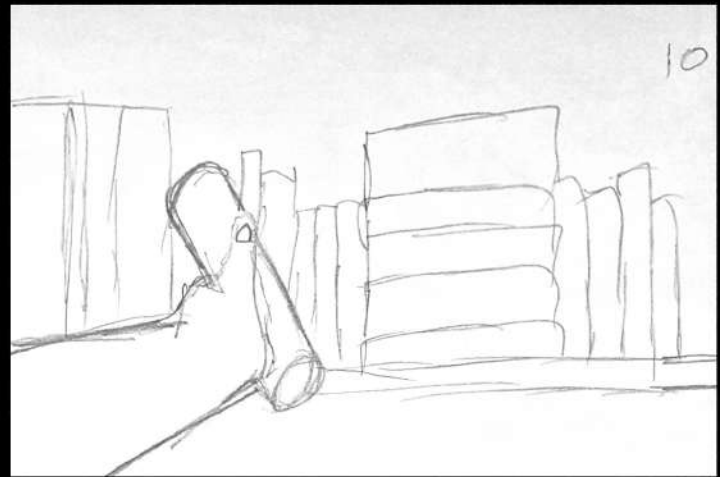

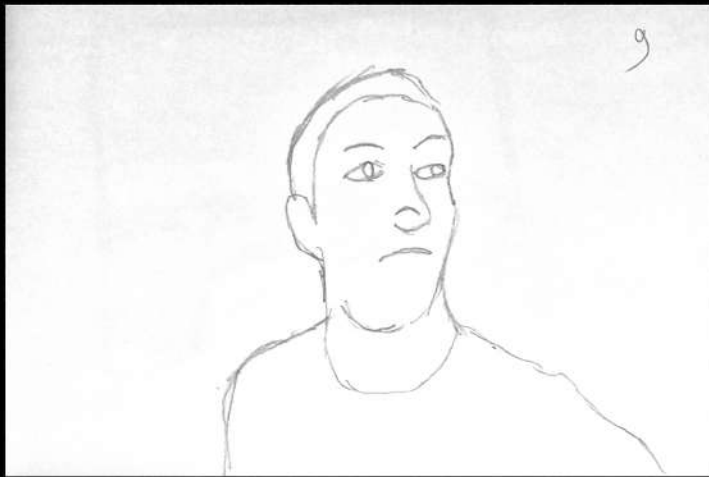

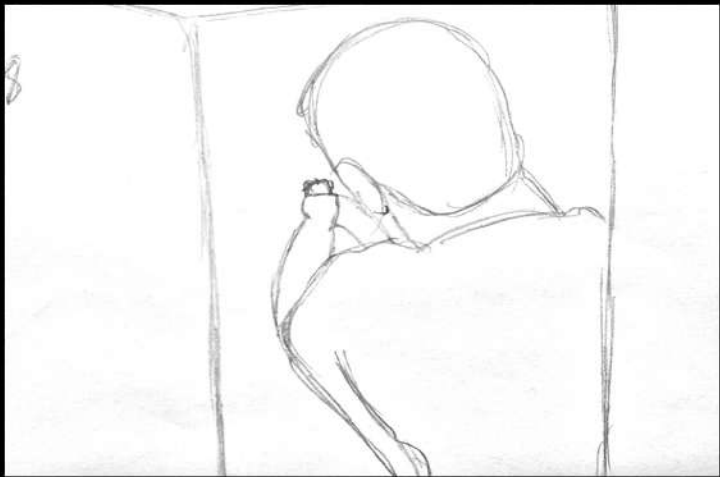

SCENE 6

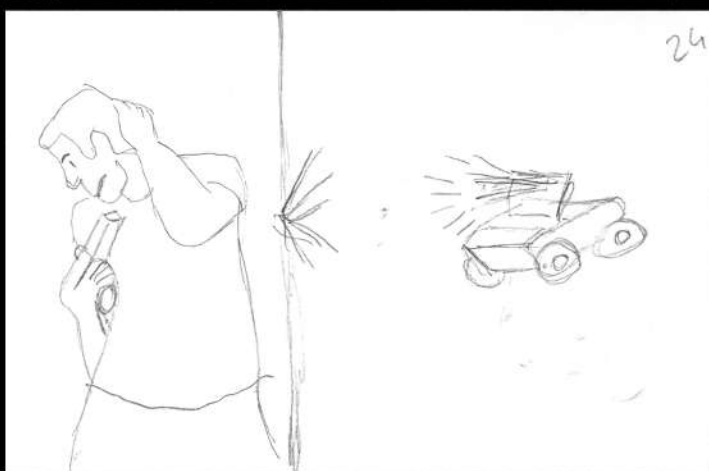

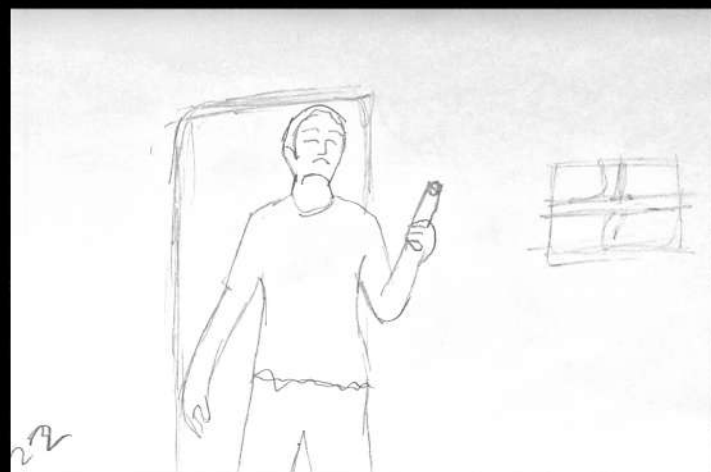

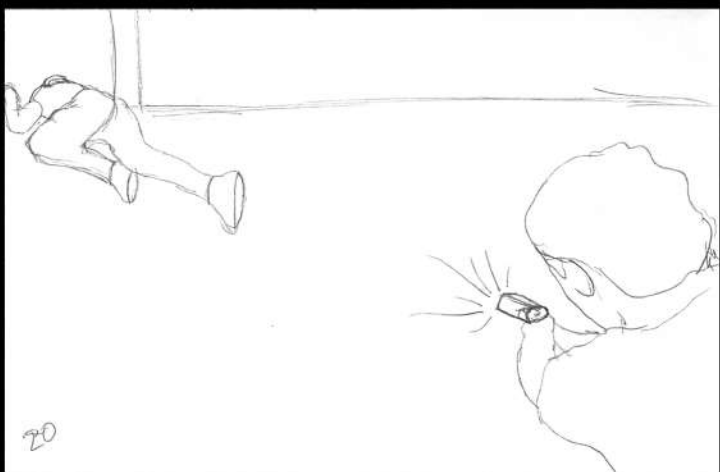

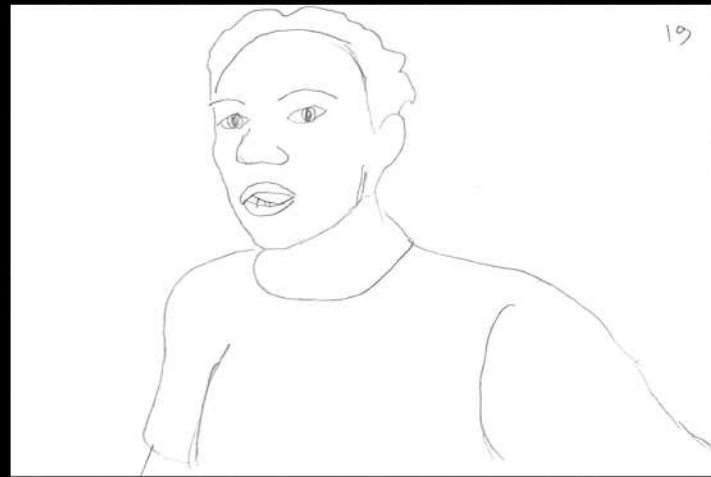

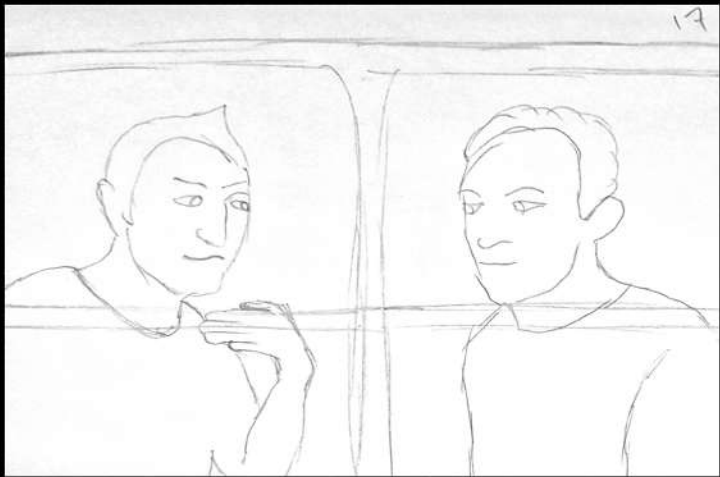

A soldier using a drone controls the drone while cowering against a wall. Meanwhile, a vehicle stops behind the wall. A soldier gets out of the vehicle with his rifle and moves towards the place marked on the radar in his hand; the soldier using the drone. While the soldier using the drone follows the vehicles chasing each other from the drone, on the other hand, he tries not to be noticed by the soldier approaching him. After a while, he sees from the drone camera that one of the vehicles has crashed. Meanwhile, the soldier approaching him steps on a mine at the foot of the wall when he is very close to the wall and suddenly freezes. He cannot move his foot and starts to sweat cold sweat. The soldier using the drone sees the key being taken from the driver of the crashed car. The soldier who takes the key notices the drone, looks towards the camera and points his gun at the drone.

SCENE 7

The driver in the front of the 2 cars chasing each other runs off the road and crashes into the bridge barriers as a result of gunfire from the car behind. The other car brakes suddenly and stops next to the buggy, and the soldier inside gets out of the car with his rifle and goes to the soldier who crashed. He removes the key from the soldier's wrist and hangs it around his neck. Meanwhile, he hears the drone and looks up. The drone is watching him overhead. After looking at the drone angrily for a while, he points his gun at the drone and shoots it down.
